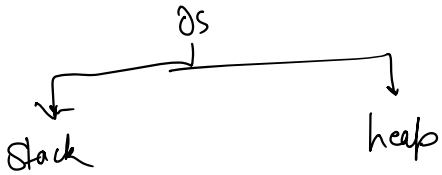
Functions Revision

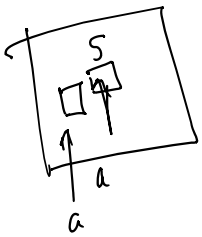
28 March 2026 16:33

Q. what is a function?

↳ It is a block of code which can be reused again in our program.



int a=5



↳ Q. write a function to check whether the given number is prime or not?

```
public boolean isprime(int n){
    boolean prime = true
    for(int i=1 → √n){
        if(n%i == 0) prime = false;
    }
    return prime;
}
```

Print 1 to n prime numbers
